Do you have a listing of consultants that could help me with air quality issues?

The Environmental Assistance Program annually updates the [Michigan Clean Air Consultant Directory](#). This directory contains a list of air quality consultants, industrial hygienists, and analytical laboratories that perform varying levels of outdoor and/or indoor air quality work. This directory is by no means an exhaustive listing. Rather, the entities listed in this directory have consented to be a part of this publication. Each entry contains the consultant's own description of expertise, qualifications, specialties, and staffing. To be included in the directory, the company must have at least one office in Michigan.

For additional guidance on how to select an environmental consultant, read the DEQ fact sheet "[Working with an Environmental Consultant](#)."

If you are an air quality consultant, industrial hygienist, or work for an analytical lab that analyzes air samples and would like to be listed in the directory, call the Environmental Assistance Program.
